

GEOGRAPHY

Habitats

Compare the habitats of the mountain hare and the brown hare in the UK, and the geography of South East Asia from where the hare originated. Compare the range of the hare, with the biomes within which it is found.

Explore the features of the natural habitat of tortoises. What type of habitat do they need to survive and where is that found? What changes might that habitat face in the future

Human geography

Explore the impact of climate change, agriculture and urbanisation on the habitat and population of hares in the United Kingdom. Examine population variances in highland and lowland Britain.
